

# Intranet Design and Development

## No tension about compliance - we can help handle it

Store your business records securely and retrieve them easily with an archiving and eDiscovery solution.

[Free 30-day Trial](#)

---

## Overview

People in your company send and receive countless messages and files that contain essential information about business, tax or legal matters. You may also be required by law or by industry regulations to maintain records for a period of time. Whatever your needs, we can help protect your business and your intellectual property with our archiving, eDiscover and compliance solutions.

With our services, you can maintain an easily accessible archive of messages and documents that can be searched, verified and audited. Our solution provides secure, long-term storage that can save you time, money and potential compliance issues.

We offer options ranging from simple business archiving to legal hold to more complex solutions designed to help you comply with other industry-specific rules.

---

## Features
