

# Spam and Virus Protection

## Enhance your inbox with a smart filter designed for you

Easy to set up, instantly effective email security service that intercepts spam and viruses before they can ever reach your inbox or servers.

[Free 30-day Trial](#)

---

## Overview

With Spam and Virus Protection (SVP) there is no onsite hardware or software required and set-up is easy: A simple change to your MX records is all it takes to get started. You'll receive a daily Held Spam Report to see the spam you're (not) missing. You can also find and restore any legitimate messages we might mistake for spam. To make SVP even more effective, the service also allows you to adjust your settings to add or block other senders automatically.

---
