

Tiki Wiki CMS Groupware

Tiki Hosting, Configuration and Customization

Tiki Wiki is the free open source web content management system with the most built-in features. It can be used as a CMS for typical business websites or as a full-featured wiki platform to facilitate teamwork and collaboration.

We have a decade of experience with Tiki Wiki and prefer it over other CMS's such as WordPress and Drupal for websites which we make for our clients.

We specialize only in Tiki Wiki CMS:

- Manual install of Tiki Wiki with server appropriate configuration, optimization, permissions, security settings and integration. Note this is **not** a one-click automated install
- 24/7 technical support by in-house Tiki Wiki experts. Can troubleshoot most issues
- Managed backup / data recovery of Tiki Wiki code and database. Snapshot every four hours
- Fast and secure web, database & CDN services for great user experience, SEO signal compliance and 100% uptime. Page load time of
- Hosting services are optimized for Tiki Wiki application. Our MariaDB based hosting is 2x faster than MySQL, servers are load-balanced and can scale up automatically, cache performance is optimized, Rackspace CDN serves images, the works...
