

RERA SaaS is finalist at mBillionth 2017 award

Niel Hirjee - 2017-06-23 02:38

RERA SaaS is finalist in the “Smart Settlements & Urbanisation” category, which “recognises the use of mobile applications that support mobility, crowdsourcing urban data and sharing information, sustainable living applications, smart cities and work environment applications”.

RERA SaaS is an ongoing web app cum mobile app based project which we are developing with partners who are real estate promoters. It is a software application which enables promoters to comply with the Real Estate (Regulation & Development) Act of 2016, property owners to access property documents & information to which they are entitled, as per RERA 2016 and regulatory authorities to query data and view reports.

Mbillionthaward seeks to not only reward all those who are taking initiatives to bridge the digital divide, empower people and bring about greater socio-economic equality but also create an ecosystem and network of such innovators and developers so that they can learn from each other, collaborate and scale up.

We are one of the 65 finalists out of the total 294 entries received for the mBillionth Awards 2017 from across South Asia. Winners will be announced at the “mBillionth Awards Gala 2017” on the 4th of August 2017 in New Delhi.
