

COVID-19 Response: We will continue to deliver uptime, reliability & support

System Administrator - 2020-04-04 08:56

The world has changed due to the coronavirus lockdown. Society and economy in India is in the process of being rebooted.

We are keeping the interests of our customers and our employees at the forefront of our decision making. For our customers, we are committed to the goal of business as usual. All systems will operate normally through the lockdown period. Our invoices are being generated and sent via email and SMS as usual but we have stopped issuing reminders for late payment of invoices. Customers will pay when they can; we will not interrupt or suspend services due to non-payment of invoices. For our employees we have already implemented WFH successfully.

We are doing the right thing and doing it the best we can.
